

Viswanathan T J Software Engineer

✉ viswanathantj@gmail.com 🔗 viswa2k.in  viswanathanTJ  viswanathanTJ

SKILLS

Programming

Python, Java, JavaScript (Core),
Shell Scripting

Frontend

HTML, CSS, JavaScript, React,
Next.js

Backend

FastAPI, Flask, Django, Spring
Boot, REST APIs, Microservices

Data & Automation

NumPy, Pandas, Automation
Scripts (Python/Shell)

Cloud & DevOps

Docker, Kubernetes, Google
Cloud, CI/CD (GitHub Actions),
Linux

Databases

MySQL, MongoDB, Redis

PROJECTS

Marksheet Management

07/2021 – 10/2021

Languages: Python, HTML, CSS, JS
Libraries & Frameworks: Flask, Bootstrap

Password Manager

09/2020 – 12/2020

Languages: Python, HTML, CSS, JS
GUI: PyQt5 Web: Flask
Database Supported: MongoDB, Firebase

EDUCATION

Master of Computer Applications,

Kongu Engineering College
10/2021 – 04/2023

B.Sc Computer Science,

Thiagarajar College
04/2018 – 05/2021

CERTIFICATES & COURSES

- RHCSA - EX200 Red Hat Certified System Administrator 
- Hackathon - State Level Participation
- IOT - Challenge Participation
- Chess - State Level Open Chess Participation
- AI Agents Intensive Course with Google

PROFESSIONAL EXPERIENCE

Software Development Engineer, Zoho Corporation

06/2023 – Present | Chennai

- Built a **CLI-based automated tool** with Python and Shell which made server configuration and deployment very simple for the team.
- Developers were able to work at a pace that was about **40% faster** due to the fact that environment setup, code changes, and testing cycles were made much more straightforward and trustworthy.
- Created backend components for a shared API gateway that dealt with the **10+ external systems** integrations, thus making CRUD operations more uniform and less complex for maintenance.
- **Real-time data synchronization** implemented across various interconnected services to enhance data accuracy and minimize the need for manual intervention.

INTERNSHIP

Software Development Engineer - Intern, Zoho Corporation

02/2021 – 08/2023

- Dived into both frontend and backend to create a full-stack **project management tool** which is now being used by internal teams to its full capacity (200+ users). I was involved in the development of backend APIs and UI components.
- The team was able to significantly cut down the integration time through **automation** where the **repeated steps were eliminated** and data flow was improved. The service integration workflows were streamlined with your help.
- I have gained real-time experience in **debugging** and issue analysis by identifying and fixing over **30 production issues** with the guidance of a mentor.
- Participated in the work of **upgrading** the current modules and API handling to make the system more user-friendly and efficient in terms of response during higher traffic.
